PROJECT CDA

- **The LTP solution for Cultural Heritage in Slovakia.**
- In 2011 The University Library in Bratislava was charged with setting up a powerful Infrastructure for the Long Term Preservation of digitized Cultural Heritage across „the National Memory“ Institutions.

PROJECT GOAL

The goal of the CDA project, officially launched in Mai 2012, is to build up an international standard based LTP archive, consisting of two active ICT configurations and one passive magnetic tape storage in geographically separated localities. The LTP system design follows strictly the OAIIS prerequisites

CDA Time Schedule

31 mes.  2012 2013 2014

13.03.2012 ERDF Contract

31.05.2012 Realisation Contract

09.07.2012 Technology Locality B

26.09.2012 1. ingested object

03.07.2013 Reconstruction Contract Bratislava

30.06.2014 Technology Locality A

27.11.2014 Certification SMIB ISO/IEC 27001:2013

31.12. 2014 Project Finished

01.01.2015 ~ 31.12.2019 Sustainability Phase

TERMS AND STANDARDS

- Based on International Standards
 - OAIS ISO 14721
 - LTP ISO 16363
 - ISO/IEC 27001
- Methodical Manuals by Ministry of Culture Slovak Republic
- Long Term Preservation of digitized Slovak Cultural Heritage
- 25 PetaByte Capacity
- 3 Locations
- 3 Data Copies

LOCATIONS

- CDA-A
Data Center
University Library in Bratislava
- CDA-B
